

Beyondtech PureOptics™ Optical Terminal Box

Order Code: BTOTB0211W

Also known as a rosette, is a device used in fiber optic networks to protect and house the terminations of fiber optic cables. OTB's are typically installed indoors, close to end users, and serve as the connection point between the main fiber optic network and individual devices.

FEATURES AND BENEFITS

- Provides a connection point for the main fiber optic cable coming from the service provider to branch out individual fiber optic cables going to different rooms or devices.
- Equipped with adapter ports, usually SC or LC connectors, to facilitate easy connection and disconnection of fiber optic cables.
- Designed to be compact and aesthetically pleasing for indoor placement. May be wall-mounted or placed on a tabletop depending on the model.
- Designed for simple installation by ISP or qualified technicians. Design minimizes clutter and allows for efficient use of space within a home or business.

SPECIFICATIONS

Applications:

Interior of Homes and Businesses, Office Buildings and Campuses, Indoor use recommended.

IN/OUT Ports:

1 / 2

Inlet/Outlet Caliber:

Drop - 3,0 mm

Max. Splice Capacity:

MAX: 03

Dimensions (H*W*D):

117 mm X 86 mm X 23 mm

Operating Temperature:

- 40°C + 65°C

Package Contents:

Installation kit
